

Stephano Ng

/ Hao Nguyen Vinh

Lead Product Designer

Dear Hiring Team,

I'm a product designer looking for my next role. The work I enjoy most is on products where the business rules are complicated and the design has to make them usable. That's where most of my nearly eight years have gone, in banking, lending, Web3 and enterprise platforms.

Most recently I was UX Lead on a pharma compliance SaaS platform in the US. A single program passes through 17 roles, each with its own approval step. I drew as-is and to-be flows for every role and checked them against the client's real program data before we cut the backlog down to one release. It went live in June 2026. On the same project, AI drafted the spec, the screens and working code from one source, so four delivery phases closed into two.

Before that I spent four years at FPT Software leading design for a cross-functional team of 10 across the VN, US and JP markets. I set the UX direction, signed off high-impact work before release, and wrote solution proposals that won new customers.

Leading that team is where I picked up the delivery side of the job, and I'm PMP, PMI-ACP and PSM certified, so scope and timelines are part of how I design. What I want next is a senior design role where I own the experience and stay close to how it gets built.

Thank you for taking the time to read this, and the full details are in my resume below. I'd be glad to talk about the product your team is building and where design needs the most help right now.

Best regards,

Stephano Ng

Stephano Ng / Hao Nguyen Vinh

Lead Product Designer

Product designer with **nearly eight years** in banking, lending, Web3 and enterprise platforms, mostly on products where the business rules are complicated. I start from the problem, set the UX direction and stay with the work until it ships. For four of those years I led design for a cross-functional team of 10 at FPT Software, serving the VN, US and JP markets.

EXPERIENCE

UX Lead & Product Consultant — H3Tech, Inc.

Jan 2026 – Jul 2026

Product and UX consultant to an in-house platform team, from discovery through delivery.

- Framed product problems with the in-house team before a solution was chosen, then ran discovery with stakeholders.
- Turned the findings into a prioritised backlog, with each item tied to a business outcome.
- Set the UX direction and reviewed delivery against it.
- Advised on ways of working so design, engineering and the business stayed aligned through release.

Lead Product Designer / Project Manager — FPT Software

Oct 2021 – Dec 2025

Four years across finance, Web3 and automotive engagements serving the VN, US and JP markets. Lead product designer on some, project manager on others.

- Led design for a cross-functional team of 10 on a B2B auction platform for VN, US and JP, owning its UX/UI strategy through release.
- Set the UX architecture direction and signed off high-impact work before it shipped, so design, engineering and product worked from one set of decisions.
- Found design bottlenecks early and cleared them before they held up delivery.
- Wrote solution proposals that won new customers by tying the UX to their business needs.

Sr. Product Designer — Aperia Solutions

Feb 2020 – Jun 2021

Design across ten core banking products that had to behave as one ecosystem.

- Helped establish the design system those 10 products shared, so every team built from one consistent base.
- Gathered requirements directly from banking customers and turned them into prioritised improvements.
- Produced wireframes, prototypes and UX frameworks to make the financial platforms easier to use.

Product Designer — Tinh Van Software

Aug 2019 – Oct 2019

A lending service reaching more than 500,000 customers.

- Owned the service's UX and worked with stakeholders to fit its business rules into flows people could complete.
- Ran user research and usability testing to check those flows against real users.
- Partnered with engineering to ship responsive, accessible interfaces.

EXPERIENCE (CONTINUED)

UI/UX Designer — Panic Bear

Dec 2018 – Mar 2019

First product role: the storefront for an electronics business selling into Australia, with conversion as the measure.

- Improved the UX of the product pages to lift usability and conversion.
- Built interactive prototypes and tested them with users before build.
- Kept design documentation and style guides current so the work stayed consistent across projects.

SELECTED WORK

Speaker Bureau Platform — pharma compliance SaaS, UX lead	stpnguyen.com/case-studies/healthcare
