Ho Chi Minh City, Vietnam

Dear Hiring Team,

I'm looking for my next role as a Product Manager. What draws me to the work is getting users, design, engineering and the business moving toward the same outcome.

My background is Product Design and Project Management, nearly eight years of it, mostly on finance and enterprise products. My titles were mostly design titles, but the work kept reaching past design into requirements, scope and delivery. I'm PMP, PMI-ACP and PSM certified.

The clearest example is an internal customer-visit tool at FPT Software, where I was the project manager. I ran the research and held scope, timeline and resourcing through weekly status reports. The redesign modelled a 42% cut in time on the main task, from 6.2 to 3.6 minutes. Across my four years there I led a cross-functional team of 10 for the VN, US and JP markets and wrote solution proposals that won new customers.

Most recently, as UX Lead on a pharma compliance SaaS platform in the US, I helped cut a backlog spanning 17 roles down to one release, which went live in June 2026. What I haven't had the chance to do yet is own a product end to end, from the first problem to the numbers after launch. That's what makes a PM role interesting to me.

Thank you for taking the time to read this, and the full details are in my resume below. I'd be glad to talk about the product your team owns and what you'd want from a PM in the first few months.

Best regards,

Stephano Ng

Stephano Ng / Hao Nguyen Vinh

Product Manager

Product and delivery lead with **nearly eight years** in banking, lending, Web3 and enterprise platforms. I came up through product design, and the work grew into requirements, scope and delivery. At FPT Software I led a cross-functional team of 10 for the VN, US and JP markets for four years, and ran some engagements as project manager. **PMP, PMI-ACP and PSM** certified.

EXPERIENCE

UX Lead & Product Consultant — H3Tech, Inc.

Jan 2026 – Jul 2026

Product consultant to an in-house platform team, from discovery through delivery.

- Ran discovery with stakeholders and turned the findings into a prioritised backlog, with each item tied to a business outcome.
- Framed product problems with the in-house team before a solution was chosen.
- Advised on ways of working so design, engineering and the business stayed aligned through release.
- Set the UX direction and reviewed delivery against it.

Project Manager / Lead Product Designer — FPT Software

Oct 2021 – Dec 2025

Four years across finance, Web3 and automotive engagements serving the VN, US and JP markets. Project manager on some, lead product designer on others.

- As PM on an internal customer-visit tool, held scope, timeline and resourcing through weekly status reports. The redesign modelled a 42% cut in time on the main task (6.2 to 3.6 minutes).
- Led a cross-functional team of 10 on a B2B auction platform for VN, US and JP, owning its UX/UI strategy through release.
- Wrote solution proposals that won new customers by tying the product to their business needs.
- Kept UX, engineering and product on one set of decisions, and cleared bottlenecks before they held up delivery.
- Reviewed high-visibility releases against the agreed scope and signed off high-impact work before it shipped.

Sr. Product Designer — Aperia Solutions

Feb 2020 – Jun 2021

Ten core banking products that had to behave as one ecosystem.

- Gathered requirements directly from banking customers and turned them into prioritised improvements.
- Helped establish the design system those 10 products shared, so every team built from one consistent base.

Product Designer — Tinh Van Software

Aug 2019 – Oct 2019

- Designed UX for a consumer lending service, working with stakeholders to fit its business rules into flows people could complete.
- Ran user research and usability testing to check those flows against real users.

EXPERIENCE (CONTINUED)

UI/UX Designer — Panic Bear

Dec 2018 – Mar 2019

- Improved UX for an electronics storefront in the Australian market, with conversion as the measure.
- Built interactive prototypes and tested them with users before build.
