

Stephano Ng

/ Hao Nguyen Vinh

Product Manager

Dear Hiring Team,

I'm excited to apply for a Product Manager role on your team. What draws me to the work is simple: I enjoy the space between users, design, engineering and the business, and I care about getting everyone moving toward the same outcome.

My background is in Product Design and Project Management. I've been doing this for nearly eight years, mostly on finance and enterprise products. My titles were mostly design titles, but the work kept reaching past design into requirements, scope and delivery.

A few examples. At FPT Software I spent four years leading a cross-functional team of 10 for the VN, US and JP markets. On an internal customer-visit tool I was the project manager, holding scope, timeline and resourcing through weekly status reports. The redesign modelled a 42% cut in time on the main task, from 6.2 to 3.6 minutes. I also built solution proposals that won new customers. Before that, at Aperia, I helped set up a design system shared by 10 core banking products.

What I haven't had the chance to do yet is own a product end to end, from the first problem to the numbers after launch. That's what makes a PM role interesting to me. I'm PMP, PMI-ACP and PSM certified, and I've been exploring how AI can improve product development and internal workflows.

Thank you for taking the time to explore my work. My resume is below. If anything here feels relevant to what your team is building, I'd be glad to talk.

Best regards,

Stephano Ng

Product and delivery lead with **nearly eight years** across banking, lending, Web3 and enterprise platforms. I frame the problem before the solution, decide what earns a place on the roadmap, and keep design, engineering and the business on one plan through delivery. Four of those years were at FPT Software, leading a cross-functional team of 10 for the VN, US and JP markets. **PMP, PMI-ACP and PSM** certified.

EXPERIENCE

UX Lead & Product Consultant — H3Tech, Inc.

Jan 2026 – Jul 2026

Consulted on product direction for an in-house platform team: framing the problem before the solution, prioritising what earned a place on the roadmap, and keeping decisions tied to business outcomes.

- Ran discovery with stakeholders and turned the findings into a prioritised backlog.
- Partnered with the in-house team to frame product problems before committing to a solution.
- Advised on ways of working so design, engineering and business stayed aligned through delivery.
- Set the UX direction and reviewed delivery against it.

Project Manager / Lead Product Designer — FPT Software

Oct 2021 – Dec 2025

Four years across finance, Web3 and automotive engagements serving the VN, US and JP markets. Project manager on some, lead product designer on others.

- Led a cross-functional team of 10, owning UX/UI strategy and execution for a B2B auction platform across VN, US and JP.
- As PM on an internal customer-visit tool, held scope, timeline and resourcing through weekly status reports; the redesign modelled a 42% cut in time on the main task (6.2 to 3.6 minutes).
- Built tailored solution proposals that won new customers by tying the product to their business needs.
- Aligned UX, engineering and product around one set of decisions.
- Found and cleared bottlenecks to protect delivery throughput.
- Reviewed high-visibility releases against the agreed scope and signed off high-impact work before it shipped.

Sr. Product Designer — Aperia Solutions

Feb 2020 – Jun 2021

Worked across ten core banking products, establishing the shared design system and turning customer requirements into changes that shipped.

- Gathered requirements directly from customers and turned them into prioritised product improvements.
- Helped establish a design system serving 10 core banking products, giving teams a consistent, scalable base.
- Held products to consistent behaviour so the banking ecosystem read as one product.

Product Designer — Tinh Van Software

Aug 2019 – Oct 2019

- Owned UX for a lending service serving 500,000+ customers.
- Worked with stakeholders to turn business requirements into flows people could complete.
- Ran user research and usability testing to close the gap on product-market fit.

EXPERIENCE (CONTINUED)

UI/UX Designer — Panic Bear

Dec 2018 – Mar 2019

- Improved UX for electronics products in the Australian market, with conversion as the measure.
- Built interactive prototypes and ran user testing to validate interactions before build.
